

COVID-19 ACTION PLAN

To our Community,

We sincerely hope that this message finds you well, safe, and meeting the challenge!

The safety & well-being of our employees and customers is of the utmost importance to us. The following is a COVID-19 preventative action plan that we have introduced to give you the confidence that we are prepared to act in our community's safe best interest.

1. Symptom-free personnel.

Only ROY'S personnel that are symptom-free will be working. Every ROY'S employee is required to have their temperature checked or must self administer a temperature check with an infrared, non-contact thermometer each day upon their arrival at our office. Those with a temperature greater than **100.4 degrees Fahrenheit (38 degrees Celsius)**, are not permitted to work on-site.

Additionally, employees are required to perform a COVID-19 self assessment each day. If an employee experiences any of the following, they will not be permitted on-site both at ROY'S or any customer premises.

- (1) Recent, new, or unexplained symptom of sickness (COVID-19 related or other such as but not limited to: **fever, cough, shortness of breath, fatigue, sore throat, muscle pain, chills, diarrhea, new loss of taste or smell**).
- (2) Close contact (e.g. less than 6-feet or 2-meters for more than 15 minutes) with someone confirmed to have COVID-19 in the last 14 days.
- (3) Traveled outside of country in the past 14 days or to a location which requires a mandatory quarantine.

2. Personal Protective Equipment.

Personal protective equipment (high-quality cotton face mask with a filter or 3-layer, & disposable gloves) is mandatory both for your safety as well as our own. As required, we will also wear any new or additional PPE that is provided, encouraged, or made available by our customers.

At ROY'S, mask wearing is encouraged at all times and is mandatory for ROY'S employees when a safe distance of at least 6-feet cannot be maintained or when leaving one's personal workspace.

3. Distance.

We will make every reasonable effort to keep a safe distance of at least 6-feet from other on-site personnel at all times.

4. Over the phone support.

Where possible, we will make every effort to troubleshoot your issues over the phone first to more effectively diagnose, and isolate the issue thereby reducing the time on your premises (if required).

5. Scheduled arrivals.

Scheduled arrivals allow you to prepare for and coordinate our arrival with your security, safety, and office personnel to ensure compliance with your on-site safety policies and procedures.

6. Limited contact.

We will only touch what we are there to service, deliver, or pick-up. Additionally, we will deliver/pick-up to and from established drop-off/pick-up areas, locations, or drop-zones as requested. Upon completing a service on equipment, we will disinfect the machine and inform you that our work is complete.

7. Assigned technicians.

We will make every effort to assign/dispatch the same service people to your premises if/when multiple visits are required.

8. Cleaning & Disinfecting.

ROY'S frequently touched surfaces are to be routinely cleaned and disinfected daily or between employee use with EPA approved disinfectants. Such surfaces include, but are not limited to, door handles & knobs, light switches, sinks, countertops, desks, vehicles, dollies, and shared electronics.

We remain committed to diligently monitoring the developments of COVID-19. As more information comes to light and best practices evolve, we will make every accommodation to help keep both you and our ROY'S team safe. Should you have any questions, comments, or concerns, please contact me at your convenience.

Sincerely,

Your Team at Roy's Copier
